Please ask your plumber to install a water pressure limiting device if your water pressure exceeds 500kpa. This is part of Australian Standards AS/NZS3500:2003 clause 3.3, 3.34. If your water pressure exceeds 500kpa, the warranty is void. As a proactive precaution, a pair of isolating tap filters are included free with every sink and basin mixer. These isolating taps will filter water to the cartridge and prevent debris getting into the cartridge. Cartridges carry a 5 year warranty with a part replacement warranty. All tapware is available in chrome, matt (satin) chrome and brushed chrome finishes.
